

## ETL Proposal

Looking at grocery store and grocery data

### Data Sets

1) [https://www.kaggle.com/heeraldedhia/groceries-dataset?select=Groceries\\_dataset.csv](https://www.kaggle.com/heeraldedhia/groceries-dataset?select=Groceries_dataset.csv)

2) <https://www.kaggle.com/yuhuaxiong/grocery>

Potential cleaning/formatting - date, currency

Possible joins on dates, currency, etc in relational database (Postgres)
